Summary

I am a front end developer who develops web and mobile applications with experience developing several websites and mobile applications. I have a strong understanding of several programming languages and am always ready to improve and expand my skills. I am also easy to learn new things and adapt to new environments so it is easy for me to collaborate with other developers.

Education

IDN Boarding School, Software Engineering Student (2023 - Present)

Experiences

SMP Islam Nurul I'tishom, Bekasi

Jan 2024

Trainer JavaScript

- Conducted face-to-face JavaScript training sessions for entry-level learners.
- Covered core JavaScript concepts including variables, data types, functions, looping, conditionals, DOM manipulation, and events.
- Taught debugging techniques using browser developer tools and console logs.
- Explains the basics of client-side scripting and how JavaScript improves user interaction.

KV. Sepang, Malaysia

Jun 2024
